ABOUT

Full-stack engineer with a backend-heavy focus. I'm comfortable writing solid SQL queries and designing event-driven systems, particularly with RabbitMQ. I also care about test coverage as a tool for confidence rather than a box to tick. At ease across the infrastructure stack too, from Docker and Kubernetes to Terraform and CI/CD pipelines.

More recently, I've integrated AI coding assistants into my daily workflow and actively follow how the tooling is evolving.

I value clean and readable solutions, enjoy mentoring and thorough code reviews, and work best on teams that prize honest technical feedback and shared ownership.

SKILLS

Backend Ruby on Rails, Java (Quarkus), PHP, PostgreSQL, RabbitMQ

Frontend Angular, React, Ember.js, Ionic

Cloud & DevOps Docker, Kubernetes, Helm, Terraform, AWS (ECS/Fargate, S3, CloudFront), Heroku, CI/CD

Practices Event-driven architecture, automated testing, code review & mentoring, agile delivery

EXPERIENCE

Commuty

Louvain-la-Neuve, Belgium

Software Engineer

November 2023 – present

- Full-stack engineer on a 10+ microservices ecosystem (Rails, Java/Quarkus, Angular) powering a parking and mobility platform.
- Delivered core platform features end-to-end: parking booking flows, notification systems, public APIs and internal tooling.
- Contributed to infrastructure on AWS with Docker, Kubernetes and Helm, including first-time Kubernetes deployments of new services.

Squarehub

Brussels, Belgium

Tech Lead

July 2022 – October 2023

- Led development of a recruitment platform (Ruby on Rails, React), taking the product from a freelance-built MVP to a production-ready offering.
- Managed and coached a team of 3 engineers, defined the technical roadmap, and worked closely with founders on product priorities.
- Oversaw data security and compliance, improved internal tooling and automation, and handled engineering hiring.

Overloop (ex [Prospect.io](#))

Namur, Belgium

Full-Stack Developer

December 2019 – June 2022

- Full-stack work on a SaaS sales engagement platform (Ember.js + Ruby on Rails), delivering new features and refactoring legacy code.
- Focused on performance and scalability improvements while collaborating closely with product and sales teams.

EDUCATION

Institut Paul Lambin — Bachelor of Computer Science and Management, *Cum Laude*

2015 – 2019

Cégep de Chicoutimi — Mobility Exchange in Computer Science, Quebec

Aug – Dec 2018
